## CISO / DPO AS A SERVICE PREP AND AUDIT SUPPORT

### General

Many clients don't have full-time information security or data privacy leadership, or in some cases, employees to run a program after inception. New regulations and standards are mandating program oversight roles such as Chief Information Security Officer and Data Privacy Officer by competent professionals, negating the old approach of assigning it as a secondary responsibility within the existing management resource pool. Notwithstanding this, organizational maturity or budgets may preclude their ability to hire a full-time employee.

### CISO as a Service

To assist clients in the operational management of a production ISO 27001 or other structured Program, CIMA provides part-time and full-time contract resource support by qualified and experienced professionals.

While these resources can manage the full operational activities of a comprehensive program, they are typically called upon to facilitate specific higher-level functions such as running and managing the ISMS performance management program, customer presentations, interim CISO, etc. to address critical activities internal staff is not capable of taking on and supporting.

### DPO as a Service

To assist clients seeking to quickly source a data privacy specialist to service as the organization's Data Privacy Office for GDPR compliance, we offer services identical to our CISOaaS for the functional area of Data Protection.

### What You Get

A contract resource providing leadership and operational support on-demand, or as contracted.
