## ISO 27001 MANAGEMENT REVIEW FACILITATION

### General

The ISO 27001 standard mandates an organization's leadership perform an official review of its Information Security Management System (ISMS), prior to engagement of a certification body.

This review is a mandatory activity, which must be performed and be supported by evidence of it being performed.

### Management Review Prep

Many clients seek the assistance of expert firms like CIMA to facilitate the first time going through the official management review.

To help prepare, CIMA will work with your team to identify, collate and provide advanced distribution of relevant program records to members of your ISO 27001 Leadership Committee for review.

We will also draft the agenda document, which includes a statement of the meeting's objective, as well as key agenda topics to be covered. We will also develop a process document to follow for subsequent meetings

### Meeting Facilitation

To ensure the successful outcome of the Management Review, CIMA will act as your meeting's facilitator guiding your ISO 27001 Leadership Committee through the agenda items, capturing draft minutes and continuous improvement directives mandated during the session.

### What You Get

During a typical engagement clients receive a documented copy of the meeting agenda, minutes, and continuous improvement directives.
